Job Description

Position: Quality Inspector (Coatings) (ICorr Level 2 and 3)

Reports to: Project Director

Location: Govan or Scotstoun

Contract Type: Long-term contract, full time

Overview of the role

The Quality Inspector (Coatings) (ICorr Level 2 and 3) is responsible for monitoring and reporting compliance with quality standards and procedures that regulate the preparation and application of coatings and surface treatments. The Quality Inspector will also recommend methods to improve overall quality and assist in analysing quality concerns.

Role responsibilities

- Perform inspections and testing in accordance with the guidance specified in the relative Inspection and Test Plan (ITP) and appropriate references, such as project specification(s), internal (work) instructions, industry standards, reporting formats.
- Ensure overall end-to-end compliance with project specification(s) and Client requirements.
- Record ambient conditions to ensure they are acceptable for the required process output.
- Ensure that material is stored and handled in accordance with the manufacturer's requirements, data sheets are available, when required, material traceability is maintained and that the correct material is used.
- Monitor performance of our painting / blasting personnel to ensure 'Applicators' carry out their works to the contracted requirements and, where appropriate, the equipment being used is in a serviceable condition.
- Ensure inspection and test equipment is serviceable before use, with a valid current 'In Calibration' period and that inspection personnel are knowledgeable in its use.
- Ensure blast medium and coating materials conform to project specifications.
- Ensure surface preparation blast profile/cleanliness meet requirements.
- Monitor dry film thickness and re-coating intervals.
- Ensure any identification marks or tags that are removed or overcoated are replaced.
- After the designated curing activity for overcoating or completion, conduct a visual inspection together with specified non-destructive and / or destructive tests.
- Prepare daily reports on agreed format(s) for the status of work and progress.
- Support internal or third-party audits of the Company's quality control system.

- Timely inspection during all aspects of preparation and coating works and be proactive in the prevention and resolution of non-compliance issues.
- Liaise with Client representative(s) for inspection and data output.

Skills and experience

- Institute of Corrosion (ICorr) qualification Level 2 and Level 3
- Technical coating experience to include the following:
 - Painting and coating specifications
 - Flaw/discontinuity identification and classification
 - Blasting and surface parameters
 - Painting techniques
 - Coating repair systems
- Where specialist removal of applications is involved, such as FBE coating or glass flake, the successful candidate will be required to demonstrate experience or undergo additional training
- Additional complementary qualifications, such as Supervisor Training and Lead Auditor
- Coatings industry experience that includes a coatings inspection regime associated with a large project
- Related industrial services experience, either site or office based
- ISO:9001 quality systems awareness
- Construction health and safety awareness
- Excellent written and verbal communication skills
- Personal drive, motivation and commitment
- Resides locally or within a short distance to the Project site
